

EasyFlex System

Motion chair's EasyFlex is an innovative system that enables the user to adopt dynamic body movements while seated. This flexibility, combined with an adjustable counter pressure, ensures optimal back support for the user, across a range of seated postures.

3 Position Tilt Limiter

MOTION Chair's back tilt with variable limit adjustment up to three positions can be used based on nature of activity performed. The unique flexing and the spring back motion of the chair is a result of the complex design construction and hi-tech compounded engineering plastics.

Height Adjustable Armrest

Armrest height can be adjusted using the knob provided under the arm-top.

Seat Height Adjustment

Seat Height can be adjusted as per the user height using the knob provided.
